

EVENT LIGHTING

(without solar panel for short term events)

Overview: One light head on a ground screw.

Utilising the Orca solar lighting system* on a 6 meter high light aluminium pole and re-locatable ground screw.

FEATURES:

- Powerful light
- Clean white light creates true true daylight colour at night
- Safe: A 12 volt DC system
- Quick & easy install and relocation
- 42 hours run time
- Optional banner advertising

Quick 30 minute install by two person team.

Screw footing is certified to cyclonic wind conditions.

Screw footing is suitable for all soil, and clay types and not suitable for concrete, asphalt and solid rock surfaces.

Perfect for short term events (less than 42 hours of light).
