

TEMPORARY LIGHTING

(with solar panel for medium to long term requirements and all night light)

Overview: one light head on concrete block:

Utilising the Orca solar lighting system* with single luminaire and solar array on a 6 meter high steel mid hinge pole and relocatable precast concrete block.

FEATURES:

- Powerful light
- Clean white light creates true daylight colour at night
- Safe: A 12 volt DC system.
- Quick & easy install and relocation
- Fork lift moveable
- All night run time
- Optional banner advertising
- Pole swings down for easy access to solar panel and luminaire.

Quick 30 minute install by two person team.

The precast concrete block can be easily relocated around the site via a forklift or crane (certified for this purpose).

Perfect for road works, construction, temporary infrastructure and industry.
