

# TEMPORARY LIGHTING

(with solar panel for medium to long term requirements and all night light)

Overview: Two light heads & ballast tub:

Utilising two Orca solar lighting systems\* with two luminaires and solar arrays on a 6 meter high light aluminium pole and re-locatable plastic tub footing

## FEATURES:

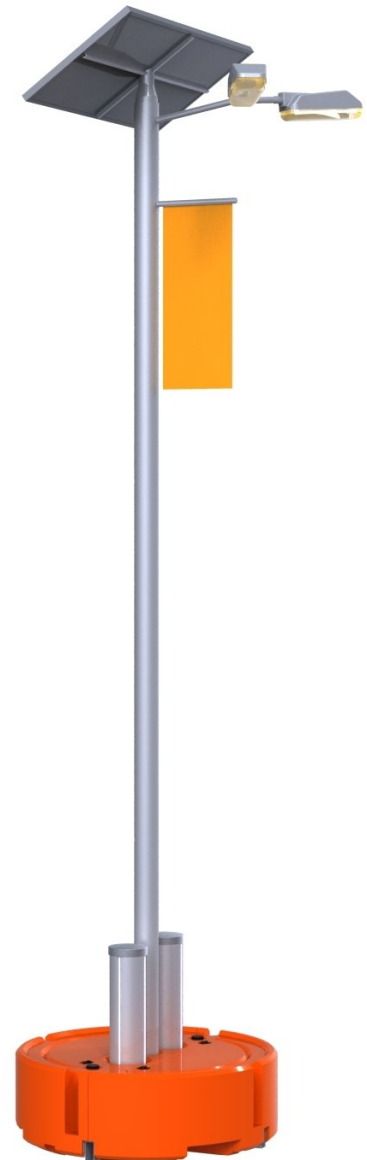

- Two powerful lights
- Clean white light creates true colour at night
- Safe: A 12 volt DC system
- Quick & easy install and relocation
- Can be moved with a forklift
- All night run time
- Optional banner advertising

Quick 45 minute install by two person team.

The plastic tub footing is perfect for any reasonably flat surface. It is filled with sandbags or water to secure the light pole.

Forklift capability, dual tub capability. Each tub can provide 700kg of ballast plus 4 mini screws into the ground if required.

Perfect for road works, construction, temporary infrastructure and industry.
